**A seasoned, creative front-end developer well-versed in responsive user interfaces for enterprise B2B, B2C, social media, NGO and .edu web sites and applications**, within various content management systems and application development environments.

A meticulous, diligent problem-solver, driven to identify simple, elegant solutions to complex problems; a collaborative team-player with excellent verbal and written communication skills, experienced liaising with clients, stakeholders & multi-disciplinary teams; a discerning eye for UX Design and consistency in visual design; obsessed with HTML & CSS optimization; experienced with W3, WAI and WCAG validations and testing; experienced in broadcast audio post-production and optimization media for the web.

**Current Primary Areas of Focus:** Javascript, Vue.js, Node.js

**Objective:** a challenging full-time position or long-term contract

**Primary Proficiencies:**

- w3-standard HTML & CSS (animation, SCSS/SASS), Javascript, jQuery, GIT, WordPress, Adobe PhotoShop, Figma, OmniGraffle; WAI, WCAG standards-compliance; Atom, BBEdit

**Ancillary Proficiencies:**

- C# ([DOT.NET](https://dotnet.microsoft.com/)), Java (GWT), Apache, PHP, MySQL, Foundation  
- IntelliJ IDEA

**Summary of Professional Experience**

**Jobson Interactive 2020.08 ~ present (2022.04); UI/Front-End Developer, UX Designer**

Primary User Interface/Front-End Developer & User Experience Designer on a team developing e-commerce platform serving the B2B optical industry; UXD, HTML, CSS, Javascript (native, jQuery), Git, PhotoShop, C# (DOT.NET framework).

- greenfield UXD & UI development of API-consuming, scalable, responsive, comprehensive e-commerce templates: catalog (including extensive, client-bespoke filters), shopping cart, checkout flow, account views (order history, returns, promotions, payment gateway, etc.), etc.; liaise with clients re: technical requirements, marketing assets & design, etc.

## **REZI (rentrezi.com) 2019.05 ~ 2020.04; Front-End Software Engineer**

Primary front-end engineer on a team of 'full-stack' (Java) engineers, developing Java/MySQL-based applications in the GWT (Google Web Toolkit) framework (HTML, CSS, Java, MySQL, GIT, Maven, GWT). Notable achievements include:

- rebuilding components – simplifying structure, improving semantics, ensuring accessibility and extensibility - resulting in significant code optimizations and eliminating dependencies;
- creating a form control library;
- engineering a fully responsive search filters component;
- building marketing pages which featured extensive animations (CSS, Javascript);
- creating a comprehensive image/icon library for use with both native HTML elements as well as dynamic Java components, enabling the elimination of numerous legacy components
